A. Refusal of orders/restrictions on trading in penny stocks and illiquid stocks:

We define Penny stocks as those stocks where the market price is below or close to par, with the company financials being weak with indicators such as loss, accumulated losses, low sales revenue, low or negative net-worth, signs of inactivity in the company, which are having very less value. Allwin Securities Limited (ASL) may from time to time identify such stocks and put trading restriction on the trades in such penny stocks. In addition to these stocks ASL may also include other stocks in the list of restricted stocks such as stocks in Z category, Trade to Trade Settlement or TS category, the scrips which are included in the list of illiquid scrips by the exchange/s or any other scrip which ASL deem fit for the purpose putting trading restriction. The restriction on above stocks may be as to the price, quantity or mode of placement of orders. Accordingly ASL reserves the right to disable certain scrips for trading on online trading facility/authorised person/branch trading terminals or put quantity or price restrictions while putting trade orders. In such case, client may be allowed to place the trades subject to certain restrictions, through ASL's centralized dealing desk after enhanced due diligence of the orders. In case of clients using internet trading facility, they may not find the scrip name or may not be able to place any order in the scrip, if such scrip is one of the restricted scrips. A client can enquire with ASL's dealer or customer service executive about any trading restriction on any scrip. The above referred restrictions are placed on the trading activities of the client as these stocks are exposed to price rigging and other market manipulative activities. Further, ASL as a member of the stock exchanges is expected to have proper surveillance and monitoring mechanism on the trading activities of their clients, particularly on penny and illiquid scrips. Clients may note that ASL shall have right to reject the orders placed by the Client and/or put circuit breakers to discourage trades getting executed at unrealistic prices from the current market price of the security or prohibit the Client from trading in illiquid securities which creates artificial liquidity or manipulates prices or to discourage Client from cross/ synchronized trading and ASL shall not be liable for any loss arising out of non acceptance or rejection of the Client orders for any such reason if the Client fails to give sufficient reason for placing such orders.

B. Client dealing:

Margin trading facility is provided in NSE cash segment. The margin facility will be carried on the basis of interest payable every month.

C. Setting up client's exposure limits:-

The stock broker may from time to time impose and vary limits on the orders that the client can place through the stock broker's trading system (including exposure limits, turnover limits, limits as to the number, value and/or kind of securities in respect of which orders can be placed etc.). The client is aware and agrees that the stock broker may need to vary or reduce the limits or impose new limits urgently on the basis of the stock broker's risk perception and other factors considered relevant by the stock broker including but not limited to limits on account of exchange/SEBI directions/limits (such as broker level/market level limits in security specific/volume specific exposures etc.), and the stock broker may be unable to inform the client of such variation, reduction or imposition in advance. The client agrees that the stock broker shall not be responsible for such variation, reduction or imposition or the client's inability to route any order through the stock broker's trading system on account of any such variation, reduction or imposition of limits. The client further agrees that the stock broker may at any time, at its sole discretion and without prior notice, prohibit or restrict the client's ability to place orders or trade in securities through the stock broker, or it may subject to any order placed by the client to a review before its entry into the trading systems and may refuse to execute/allow execution of orders due to but not limited to the reason of lack of margin/securities or the order being outside the limits set by stock broker/exchange/SEBI and any other reasons which the stock broker may deem appropriate in the circumstances. The client agrees that the losses, if any on account of such refusal or due to delay caused by such review, shall be borne exclusively by the client alone. We have margin based RMS system. Total deposits of the clients are uploaded in the system and client may take exposure on the basis of margin applicable for respective security as per VAR based margining system of the stock exchange and/or margin defined by RMS based on their risk perception. Client may take benefit of "credit for sale" i.e. benefit of share held as margin by selling the same by selecting Delivery option through order entry window on the trading platform, the value of share sold will be added with the value of deposit and on the basis of that client may take fresh exposure. Realization of the funds from the said bank instrument etc, at in case of exposure taken on the basis of shares margin the payment is required to be made before the exchange pay in date otherwise it will be liable to square off after the pay in time or any time due to shortage of margin.

D. Applicable brokerage rate: -

Brokerage will be charged within the limits prescribed by SEBI/Exchange. Brokerage will be charged to the client based on the brokerage rates specified in the account opening form or as per the product/scheme opted by the client from time to time. However, any increase in brokerage rate either be done with the consent of the client in writing or at the discretion of ASL by giving 15 days advance notice to the client. The brokerage rate shall be within the permissible limit set by SEBI/Exchanges.

E. Delayed Payment Charges:

In order to comply with the above requirement, the following policies and procedures are prescribed by Allwin Securities Limited (herein referred as ASL or the company) and shall be subject to any charge from time to time in future and would be applicable to authorised persons and all clients of the company. Imposition of penalty/delayed payment charges by either party, specifying the rate and the period (this must not result in funding by the broker in contravention of the applicable laws). Delayed payment charges / charges on Exposure against collaterals: Pursuant to Exchange bye-laws, the Member broker is currently required to make pay-in of funds to the Exchange by T+2 morning and arrange delivery of securities to the Exchange latest by T+2 morning. Further Member broker is also required to maintain adequate upfront margins with the Exchange to avail exposure for trading. The Exchanges have also defined the ratios in which the cash and collaterals are to be deposited and maintained by the Member broker. In addition the Exchange required the member broker to deposit some of the margins like MTM, in Cash only. In order to manage its working capital, ASL requires fullest cooperation of the clients in meeting their respective obligation towards pay-in and margins. ASL may therefore charge a delayed payment penalty, on monthly basis on account of delays/ failure by the client in meeting the pay-in obligations on the scheduled date and also where the clients take exposure in F&O segment by depositing collaterals in a ratio which is disproportionate to the Cash versus collaterals ratios prescribed by the Exchanges, While levying delayed payment charges on the debit balance in the running account of a client, ASL, may not consider any credit balance in the other family or group account of the client. If the client fails to make payment of the amount due within the time frame specified by ASL, it shall be entitled to levy such charges by way of penalty payment charges 24% + (Applicable GST) per annum on account due. This levy is only penal measure in case client defaults in meeting settlement and margin obligations and should not be construed as funding arrangement by the client and further the client cannot demand continuation of service on a permanent basis by citing this levy of delayed payment charges.

F. The right to sell client's securities or close clients' positions, without giving notice to the client, on account of nonpayment of client's dues:

Without prejudice to the stock brokers other right (Including the right to refer the matter to arbitration), the stock broker shall be entitled to liquidate/close out all or any of the clients position without giving notice to the client for non payment of margins or other amounts including the pay in obligation, outstanding debts etc and adjust the proceeds of such liquidation/close out, if any, against the clients liabilities/obligations. The client shall ensure timely availability of funds/securities in form and manner at designated time and in designated bank and depository account(s), for meeting his/her/its pay in obligation of funds and securities. Any and all losses and financial charges on account of such liquidations/ closing out shall be charged to & born by the client. In cases of securities lying in margin account/client beneficiary account and having corporate actions like Bonus, Stock split, Right issue etc, for margin or other purpose the benefit of shares due to received under Bonus, Stock split, Right issue etc will be given when the shares is actually received in the stock broker's designated demat account.

In case the payment of the margin / security is made by the client through a bank instrument, the stock broker shall be at liberty to give the benefit / credit for the same only on the absolute discretion of the stock broker. Where the margin / security is made available by way of securities or any other property, the stock broker is empowered to decline its acceptance as margin / security &/ or to accept it at such reduced value as the stock broker may deem fit by applying haircuts or by valuing it by marking it to market or by any other method as the stock broker may deem fit in its absolute discretion. Company on best effort basis will try and inform the client and give him reasonable time for payment. However it will be the responsibility of client to track his margins/obligations by going through margin statements sent to the client on daily basis. The stock broker has the right but not the obligation, to cancel all pending orders and to sell/close/liquidate all open positions/securities/shares at the pre-defined square off time or when Mark to Market (M-T-M) percentage reaches or crosses stipulated margin percentage, whichever is earlier. The stock broker will have sole discretion to decide referred stipulated margin percentage depending upon the market condition. In the event of such square off, the client agrees to bear all the losses based on actual executed prices, the client shall also be solely liable for all and any penalties and charges levied by the exchange(s).

G. Shortage in obligations arising out of internal netting of trades:-

Stock broker shall not be obliged to deliver any security or pay any money to the client unless and until the same has been received by the stock broker from the exchange, the clearing corporation / clearing house or other company or entity liable to make the payment and the client has fulfilled his/her/its obligations first. The policy and procedure for settlement of shortage in obligations arising out of internal netting of trades is as under.

1. The Short delivering client is debited by an amount equivalent to 20% above of closing rate of day prior to Paying/Payout Day. The securities delivered short are purchased from market on T+2 day and the purchase consideration (inclusive of all statutory taxes & levies) is debited to the short delivering seller client along with reversal entry of provisionally amount debited earlier.
2. If securities cannot be purchased from market due to any force majeure condition, the short delivering seller is debited at the closing rate on T+2 day or Auction day on Exchange +10% where the delivery is matched partially or fully at the Exchange Clearing, the delivery and debits/credits shall be as per Exchange Debits and Credits.

No consideration to trade should be made without thoroughly understanding and reviewing the risks involved in such trading. If you are unsure, you must seek professional advice on the same.

In considering whether to trade or authorize someone to trade for you, you should be aware of or must get acquainted with the following:-

1. BASIC RISKS:

1.1 Risk of Higher Volatility:

Volatility refers to the dynamic changes in price that a security/derivatives contract undergoes when trading activity continues on the Stock Exchanges. Generally, higher the volatility of a security/derivatives contract, greater is its price swings. There may be normally greater volatility in thinly traded securities/ derivatives contracts than in active securities /derivatives contracts. As a result of volatility, your order may only be partially executed or not executed at all, or the price at which your order got executed may be substantially different from the last traded price or change substantially thereafter, resulting in notional or real losses.

1.2 Risk of Lower Liquidity:

Liquidity refers to the ability of market participants to buy and/or sell securities/ derivatives contracts expeditiously at a competitive price and with minimal price difference. Generally, it is assumed that more the numbers of orders available in a market, greater is the liquidity. Liquidity is important because with greater liquidity, it is easier for investors to buy and/or sell securities/ derivatives contracts swiftly and with minimal price difference, and as a result, investors are more likely to pay or receive a competitive price for securities/ derivatives contracts purchased or sold. There may be a risk of lower liquidity in some securities/ derivatives contracts as compared to active securities/ derivatives contracts. As a result, your order may only be partially executed, or may be executed with relatively greater price difference or may not be executed at all.

1.2.1 Buying or selling securities/ derivatives contracts as part of a day trading strategy may also result into losses, because in such a situation, securities/ derivatives contracts may have to be sold/ purchased at low/ high prices, compared to the expected price levels, so as not to have any open position or obligation to deliver or receive a security/ derivatives contract.

1.3 Risk of Wider Spreads:

Spread refers to the difference in best buy price and best sell price. It represents the differential between the price of buying a security/ derivatives contract and immediately selling it or vice versa. Lower liquidity and higher volatility may result in wider than normal spreads for less liquid or illiquid securities/ derivatives contracts. This in turn will hamper better price formation.

1.4 Risk-reducing orders:

The placing of orders (e.g., "stop loss" orders, or "limit" orders) which are intended to limit losses to certain amounts may not be effective many a time because rapid movement in market conditions may make it impossible to execute such orders.

1.4.1 A "market" order will be executed promptly, subject to availability of orders on opposite side, without regard to price and that, while the customer may receive a prompt execution of a "market" order, the execution may be at available prices of outstanding orders, which satisfy the order quantity, on price time priority. It may be understood that these prices may be significantly different from the last traded price or the best price in that security/ derivatives contract.

1.4.2 A "limit" order will be executed only at the "limit" price specified for the order or a better price. However, while the customer receives price protection, there is a possibility that the order may not be executed at all.

1.4.3 A stop loss order is generally placed “away” from the current price of a stock/derivatives contract, and such order gets activated if and when the security / derivatives contract reaches, or trades through, the stop price. Sell stop orders are entered ordinarily below the current price, and buy stop orders are entered ordinarily above the current price. When the security/ derivatives contract reaches the predetermined price, or trades through such price, the stop loss order converts to a market/limit order and is executed at the limit or better. There is no assurance therefore that the limit order will be executable since a security/derivatives contract might penetrate the pre-determined price, in which case, the risk of such order not getting executed arises, just as with a regular limit order.

1.5 Risk of News Announcements:

News announcements that may impact the price of stock/derivatives contract may occur during trading, and when combined with lower liquidity and higher volatility, may suddenly cause an unexpected positive or negative movement in the price of the security / contract.

1.6 Risk of Rumors:

Rumors about companies/currencies at times float in the market through word of mouth, newspapers, websites or news agencies, etc. The investors should be wary of and should desist from acting on rumors

1.7 System Risk:

High Volume trading will frequently occur at the market opening and before market close. Such high volumes may also occur at any point, in the day. These may cause delays in order execution or confirmation.

1.7.1 During periods of volatility on account of market participants continuously modifying their order quantity or prices or placing fresh orders, there may be delays in order execution and its confirmations.

1.7.2 Under certain market conditions, it may be difficult or impossible to liquidate a position in the market at a reasonable price or at all, when there are no outstanding orders either on the buy side or the sell side, or if trading is halted in a security / derivatives contract due to any action on account of unusual trading activity or security / derivatives contract hitting circuit filters or for any other reason

1.8 System/Network Congestion:

Trading on exchanges is in electronic mode, based on satellite/leased line based communications, combination of technologies and computer systems to place and route orders. Thus, there exists a possibility of communication failure or system problems or slow or delayed response from system or trading halt, or any such other problem/glitch whereby not being able to establish access to the trading system/network, which may be beyond control and may result in delay in processing or not processing buy or sell orders either in part or in full. You are cautioned to note that although these problems may be temporary in nature, but when you have outstanding open positions or unexecuted order, these represent a risk because of your obligations to settle all executed transactions.

2. As far as Derivatives segments are concerned, please note and get yourself acquainted with the following additional features:-

2.1 Effect of "Leverage" or "Gearing".

In the derivatives market, the amount of margin is small relative to the value of the derivatives contract so the transactions are 'leveraged' or 'geared'. Derivatives trading, which is conducted with a relatively small amount of margin, provides the possibility of great profit or loss in comparison with the margin amount. But transactions in derivatives carry a high degree of risk.

You should therefore completely understand the following statements before actually trading in derivatives and also trade with caution while taking into account one's circumstances, financial resources, etc. If the prices move against you, you may lose a part of or whole margin amount in a relatively short period of time. Moreover, the loss may exceed the original margin amount.

A. Futures trading involve daily settlement of all positions. Every day the open positions are marked to market based on the closing level of the index / derivatives contract. If the contract has moved against you, you will be required to deposit the amount of loss (notional) resulting from such movement. This amount will have to be paid within a stipulated time frame, generally before commencement of trading on next day.
Signature of the Client

B. If you fail to deposit the additional amount by the deadline or if an outstanding debt occurs in your account, the stock broker may liquidate a part of or the whole position or substitute securities. In this case, you will be liable for any losses incurred due to such close- outs.

C. Under certain market conditions, an investor may find it difficult or impossible to execute transactions. For example, this situation can occur due to factors such as illiquidity i.e. when there are insufficient bids or offers or suspension of trading due to price limit or circuit breakers etc.

D. In order to maintain market stability, the following steps may be adopted: changes in the margin rate, increases in the cash margin rate or others. These new measures may also be applied to the existing open interests. In such conditions, you will be required to put up additional margins or reduce your positions.

E. You must ask your broker to provide the full details of derivatives contracts you plan to trade i.e. the contract specifications and the associated obligations.

2.2 Currency specific risks:

1. The profit or loss in transactions in foreign currency-denominated contracts, whether they are traded in your own or another jurisdiction, will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.

2. Under certain market conditions, you may find it difficult or impossible to liquidate a position this can occur, for example when a currency is deregulated or fixed trading bands are widened.

3. Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; foreign political and economic events and policies, changes in national and international interest rates and inflation, currency devaluation, and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

2.3 Risk of Option holder:

1. An option holder runs the risk of losing the entire amount paid for the option in relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires, to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.

2. The Exchanges may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

2.4 Risks of Option Writers:

1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.

2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.

3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.

3. TRADING THROUGH WIRELESS TECHNOLOGY/SMART ORDER ROUTING OR ANY OTHER TECHNOLOGY:

Any additional provisions defining the features, risks, responsibilities, obligations and liabilities associated with securities trading through wireless technology/ smart order routing or any other technology should be brought to the notice of the client by the stock broker.
